

Melville Douglas STANLIB Balanced Fund

Fund information update at 30 June 2025

What is the fund's objective?

The objective of the fund is to deliver high growth of capital and income, a reasonable level of current income and relative stability for capital invested to obtain long term wealth accumulation.

What does the fund invest in?

The fund is an actively managed multi-asset class mandate designed to reflect Melville Douglas's optimal long-term capital growth strategy. The fund focuses on delivering balance between investment returns and the risk associated with those returns, between capital growth and cash generation and balance between compound and cyclical price performers. The maximum equity effective exposure (including international equity) will not exceed 75% of the market value of the portfolio.

What possible risks are associated with this fund?

General market risks include a decline in property values, share price volatility, a change in interest rates and economic conditions. Where foreign securities are included in the portfolio there may be additional risks, such as potential constraints on liquidity and the repatriation of funds, macro-economic risks, political risks, tax risks, settlement risks, and potential limitations on the availability of market information.

	Class B1
Based on period from:	01/04/2022
Total Expense	1.31%
Performance Fee	0.00%
Transaction Costs	0.08%
Total Investment Charge	1.39%
1 Year Total Expense	1.31%

Total Expense (TER): This ratio shows the charges, levies and fees relating to the management of the portfolio and is expressed as a percentage of the average net asset value of the portfolio, calculated over the period shown and annualised to the most recently completed quarter. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER should not be regarded as an indication of future TERs.

Transaction Costs (TC): This ratio shows the percentage of the value of the fund incurred as costs relating to the buying and selling of the fund's underlying assets. TC are a necessary cost in administering the fund and impacts fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, investment decisions of the investment manager and the TER.

Total Investment Charges (TIC): This ratio is simply the sum of the TER and TC, showing the percentage of the value of the fund incurred as costs relating to the investment of the fund. It should be noted that performance figures account for all costs included in the TIC ratio, so you should not deduct the TIC from performance figures, the performance is already net of the TIC.

Fund review

The Balanced Fund delivered a return of 5.2%, against the benchmark return of 6.3% over the quarter. The performance from the fund's equity holdings detracted from the returns relative to our peer group.

Market overview

The All-Share Index and Capped SWIX posted strong quarterly performances, rising by 10.2% and 9.7% respectively, outpacing the MSCI AC World, which recorded an increase of 7.8% in Rand terms. The All share delivered a total return of 17% in the first six months of the year, its strongest first-half growth since 2006. Meanwhile, The MSCI Emerging Market Index posted gains of 8.2% in Rand terms and 12% in Dollar terms, supported by broad-based Dollar weakness.

Industrials sector emerged as the top performing sector, delivering a return of 12%, underpinned by robust gains in Naspers and Prosus. Resources posted a return of 9.2% supported by Gold's upward momentum continues to be propelled by sustained buying from central banks, heightened inflationary concerns linked to tariffs, a weakening Dollar, and ongoing geopolitical tensions which encouraged investors to seek safe-haven assets amid global uncertainty. The Rally in platinum (+37%) has been supported by a combination of tight supply expectations attributable to constrained output, weather issues and destocking. Conversely, the Financial sector was the weakest performer, posting a return of 8%.

The global economic landscape is currently shaped by a complex mix of conflicting signals and broader macro themes. Macroeconomic data is taking a back seat to more dominant narratives, particularly the erratic flow of news around global tariffs and escalating geopolitical tensions. The Federal Reserve's June meeting was broadly aligned with expectations, maintaining a balanced tone and emphasising policy flexibility. The committee unanimously opted to keep interest rates on hold.

We continue to cautiously anticipate a gradual uplift in GDP growth driven by the continued stabilisation of electricity supply, and ongoing progress of structural reforms in critical infrastructure areas.

Looking ahead

While South Africa remains exposed to global economic dynamics developments, there is reason for cautious optimism. The renewed commitment to structural growth reform, particularly in infrastructure development combined with increased private sector participation and strengthened oversight from the Government of National Unity, presents a meaningful opportunity to reshape the domestic economy. These efforts aim to place South Africa on a more sustainable and growth-oriented trajectory. Valuations for the domestic equity market continue to be attractive. Despite significant improvements in growth-supportive policy reforms, foreign investment flows remain meaningfully underweight in South Africa and investors seem to prefer to follow a wait-and-see approach. Amid global uncertainty, there are emerging signs of progress in global trade negotiations. As a result, the perceived risk of a U.S. or global recession has diminished considerably.

In conclusion, our investment strategy remains unchanged. We will continue to invest in high quality businesses that have wide and sustainable moats, that have the ability to deliver attractive compound cashflow growth through business cycles, at compelling valuations.

The FSP is a related party to the Manager, the FSP may earn additional fees other than those charged by the Manager. It is the responsibility of the FSP to disclose additional fees to the investor. This document is not advice, as defined under FAIS. Please be advised that there may be representatives acting under supervision.

All performance returns and ranking figures quoted are shown in ZAR and are based on data sourced from Morningstar or Statpro and are as at 30 June 2025.

Annualised return figures are the compound annualised growth rate (CAGR) calculated from the cumulative return for the period being measured. These annualised returns provide an indication of the annual return achieved over the period had an investment been held for the entire period. Actual annual figures are available on request from the Manager.

Portfolio performance figures are calculated for the relevant class of the portfolio, for a lump sum investment, on a NAV-NAV basis, with income reinvested on the ex-dividend date. Individual investor performance may differ due to initial fees, actual investment date, date of reinvestment of income and dividend withholding tax. Portfolio performance accounts for all costs that contribute to the calculation of the cost ratios quoted, all returns quoted are after these costs have been accounted for.

Statistics - Positive Months: the number of individual 1 month periods during the specified time period where the return was not negative; Max Gain: the maximum gain in a trough-to-peak incline before a new trough is attained, quoted as the percentage between the trough and the peak. It is an indicator of upside risk over a specified time period (quoted for all periods of 1 year or longer); Max Drawdown: the maximum loss in a peak-to-trough decline before a new peak is attained, quoted as the percentage between the peak and the trough. It is an indicator of downside risk over a specified time period (quoted for periods of 1 year or longer, where no value is shown no loss was experienced); Highest and Lowest: the highest and the lowest 1 year return (%) that occurred during the specified time period (quoted for all relevant classes launched 1 year or more prior to current month end date).
