

Melville Douglas STANLIB Global Equity Feeder Fund

Fund information update at 30 June 2026

What is the fund's objective?

The objective of the fund is to provide long-term capital growth by investing in quoted global equities and maximising investment returns in USD.

What does the fund invest in?

The fund is a feeder fund which, apart from assets in liquid form, consists solely of participatory interests of the Melville Douglas Select Global Equity Fund – a high conviction, actively managed global securities fund. The fund consists of 25-35 high quality multi-national companies from around the world. Each company must comply with our stringent requirements for quality, growth and attractive valuation.

What possible risks are associated with this fund?

General market risks include a rise or volatility in bond yields, rising interest rates, economic and political risk, inflation uncertainty and duration risk. Where foreign securities are included in the portfolio there may be additional risks, such as potential constraints on liquidity and the repatriation of funds, macro-economic risks, political risks, tax risks, settlement risks, and potential limitations on the availability of market information.

Risk rating

Conservative	Moderately conservative	Moderate	Moderately aggressive	Aggressive
--------------	-------------------------	----------	-----------------------	------------

What is the suggested investment period for this fund?

Minimum period

1 Month	6 Months	1 Year	3 Years	5 Years	7 Years
---------	----------	--------	---------	---------	---------

Who should consider investing in this fund?

The investment strategy is suitable for investors looking for long term capital appreciation. The fund objective is to deliver strong risk adjusted returns over time. Risk is mitigated through holding a range of highly profitable and proven franchises diversified across multiple sectors and geographies.

Income

Distribution Net income is calculated and accrued daily and is declared and distributed semi-annually.

Due to the nature of this portfolio it is unlikely that any net income will be available for distribution.

Declaration 30 June, 31 December

General fund information

Manager(s) Justin Maloney and Derinia Mathura
Size (NAV) R 1.19 billion
Peer group ASISA Global - Equity - General
Benchmark MSCI AC World Net
Regulation 28 Does not apply

Class B1

Launch 07 November 2016
ISIN number ZAE000227815
JSE code MDGB1
Minimum investment requirements -
Lump sum R 10,000
Monthly R 500

What are the costs to invest in this fund?

Maximum charges including VAT

	Class B1
Initial fee (manager)	0.000%
Initial fee (adviser)	3.450%
Annual fee (manager)	1.495%
Annual fee (adviser)	0.000%
Performance fee	N/A
Adviser fee	1.150%

Annual fee (manager) – this is a service charge (% based) applicable to each class of a fund, that is levied on the value of your portfolio and includes the **Annual fee (adviser)** fee (where applicable). Annual fees are calculated and accrued daily and recovered monthly from the income awaiting distribution in the fund.

Adviser fee - this is the maximum annual service fee (% based) an adviser can charge on the value of your portfolio. It is calculated and accrued daily and recovered monthly by means of a redemption of your units. It is not included in the **Annual fee**.

Cost ratios (annual) including VAT as at 31 March 2026

	Class B1
Based on period from:	01/04/2023
Total Expense	1.88%
Performance Fee	0.00%
Transaction Costs	0.00%
Total Investment Charge	1.88%
1 Year Total Expense	1.90%

Total Expense (TER): This ratio shows the charges, levies and fees relating to the management of the portfolio and is expressed as a percentage of the average net asset value of the portfolio, calculated over the period shown and annualised to the most recently completed quarter. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER should not be regarded as an indication of future TERs.

Transaction Costs (TC): This ratio shows the percentage of the value of the fund incurred as costs relating to the buying and selling of the fund's underlying assets. TC are a necessary cost in administering the fund and impacts fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, investment decisions of the investment manager and the TER.

Total Investment Charges (TIC): This ratio is simply the sum of the TER and TC, showing the percentage of the value of the fund incurred as costs relating to the investment of the fund. It should be noted that performance figures account for all costs included in the TIC ratio, so you should not deduct the TIC from performance figures, the performance is already net of the TIC.

Melville Douglas STANLIB Global Equity Feeder Fund

Quarterly update at 30 June 2026

Who are the investment managers?

Since 1983 Melville Douglas has been delivering superior investment returns across a number of asset classes. As a global boutique investment management company within the Standard Bank Group, we are uniquely positioned to offer domestic and offshore investment solutions. What truly sets Melville Douglas apart is our experienced investment team and our approach to investing – driven by balance, a long-term view and a commitment to fundamental research – which informs our investment decisions across the board.

Justin Maloney
BSc (Hons), CFA®, Chartered FCSI
Fund Manager

Justin joined Melville Douglas in 2014 and has over three decades experience of managing global equity funds. He co-manages the Melville Douglas Select Global Equity Fund and covers a range of sub-sectors for the team. Prior to joining the company, he was a global equity fund manager in London for Sanlam and F&C Asset Management. He holds a BSc (Hons) degree in Business from Cass Business School, University of London. He is also a CFA® Charterholder and a Chartered Wealth Manager. Justin is based in Jersey.

Derinia Mathura
BBusSci (Hons) Finance, CFA®
Fund Manager

Derinia joined Melville Douglas in 2013 as the lead analyst for a range of global equity holdings within the consumer discretionary sector. She is the co-manager of the Melville Douglas Select Global Equity Fund. Prior to joining, she worked for RMB Morgan Stanley as a sell-side equity research analyst covering financials. Derinia has a BBusSci (Hons) degree in Finance and is also a CFA® Charterholder.

Fund review

The fund delivered a strong positive return during the second quarter of 2026, benefiting from the rebound in global equity markets. However, despite generating a double-digit gain, performance lagged the MSCI All Country World Index, primarily due to stock selection within the Information Technology sector.

The portfolio's exposure to the continued build-out of AI infrastructure through holdings such as Nvidia, Broadcom, TSMC and connector specialist Amphenol contributed positively. However, market leadership was concentrated in the more cyclical areas of the semiconductor value chain, particularly memory chip manufacturers and semiconductor capital equipment companies, which were among the strongest performers globally.

By contrast, several of the fund's enterprise software and platform holdings remained out of favour despite their attractive long-term fundamentals. Investors continued to focus on the immediate beneficiaries of AI-related capital spending, while companies such as Microsoft received less recognition as markets awaited greater clarity on how AI investments will ultimately translate into sustainable earnings growth.

During the quarter we initiated positions in Waste Management and Waste Connections, two of the three largest waste management companies in North America. Both businesses benefit from attractive industry structures characterised by economies of scale, strong pricing power and ownership of scarce landfill assets. The sector is inherently defensive, as waste collection and disposal remain essential services regardless of economic conditions. At a time when investor attention is heavily concentrated on AI-related opportunities, we believe these high-quality businesses offer an attractive contrarian opportunity while providing diversification within the portfolio.

Market overview

Global equity markets reached new record highs as robust corporate earnings and continued enthusiasm around artificial intelligence supported investor sentiment. A key driver of market performance was the accelerating pace of data centre investment by major technology companies seeking to meet rapidly growing demand for computing power.

Market sentiment also benefited from a more constructive geopolitical backdrop. A fragile but sustained ceasefire between the United States and Iran, resilient economic data and another quarter of better-than-expected corporate earnings reinforced confidence in the global economic outlook. Expectations that shipping flows through the Strait of Hormuz would remain uninterrupted contributed to a sharp decline in oil prices during the quarter, weighing on energy stocks, a commodity sector in which the fund currently has no exposure.

Looking ahead

Periods of relative underperformance can be uncomfortable, but our experience continues to reinforce the importance of maintaining discipline and remaining invested in high-quality growth businesses. Historically, attempts to rotate away from quality growth into more cyclical or value-oriented areas of the market have only added value when executed with exceptional timing. In most cases, such style rotations have detracted from long-term returns, as periods of value leadership have tended to be powerful but relatively short-lived.

One notable exception followed the bursting of the dot-com bubble, when lower-priced "old economy" companies significantly outperformed growth stocks between 2003 and 2007. That period was supported by exceptionally strong global economic growth and the China-driven commodity boom. While investors who remained committed to quality growth were ultimately rewarded, doing so required considerable patience through several years of relative underperformance.

Although a similar environment could emerge if global growth accelerates meaningfully, neither our central economic outlook nor broader market expectations suggest such conditions today.

Importantly, many high-quality companies currently trade at valuations below their historical premiums relative to the broader market, creating a potentially attractive backdrop for future outperformance. Quality businesses have historically performed particularly well in more moderate economic environments, where investors place greater value on resilient business models and consistent earnings growth than on cyclical earnings leverage.

We believe this opportunity is reflected in the fund today. Despite strong global equity market returns over the past three and a half years, many of the fund's holdings continue to trade materially below our assessment of intrinsic value. As investor attention broadens beyond the immediate beneficiaries of AI infrastructure spending, we believe the fund is well positioned to benefit from both earnings growth and valuation normalisation over the medium to long term.

The commentary gives the views of the portfolio manager at the time of writing. Any forecasts or commentary included in this document are not guaranteed to occur.

Change in allocation of the fund over the quarter

Asset type	Q2 2026	Q1 2026	Change

Important information update at 30 June 2026

Disclosures

Collective Investment Schemes in Securities (CIS) are generally medium to long term investments. The value of participatory interests may go down as well as up and past performance is not necessarily a guide to future performance. CIS are traded at ruling prices and can engage in borrowing and scrip lending.

The Melville Douglas STANLIB Global Equity Feeder Fund is a portfolio of the STANLIB Collective Investment Scheme (the Scheme).

The manager of the Scheme is STANLIB Collective Investments (RF) (Pty) Limited (the Manager). The Manager is authorised in terms of the Collective Investment Schemes Control Act, No. 45 of 2002 (CISCA) to administer Collective Investment Schemes (CIS) in Securities. Liberty is a full member of the Association for Savings and Investments of South Africa (ASISA). The Manager is a member of the Liberty Group of Companies. The manager has a right to close a portfolio to new investors in order to manage the portfolio more efficiently in accordance with its mandate. The Manager does not provide any guarantee either with respect to the capital or the return of a CIS portfolio. A schedule of fees and charges and maximum commissions is available on request from the Manager.

The trustee of the Scheme is Standard Chartered Bank.

The investments of this portfolio are managed, on behalf of the Manager, by Melville Douglas Investment Management (Pty) Ltd, an authorised financial services provider (FSP), FSP No. 595, under the Financial Advisory and Intermediary Services Act (FAIS), Act No. 37 of 2002.

Prices are calculated and published on each working day, these prices are available on the Manager's website (www.stanlib.com) and in South African printed news media. This portfolio is valued at 15h00. Forward pricing is used. Investments and repurchases will receive the price of the same day if received prior to 15h00.

This portfolio is permitted to invest in foreign securities. Should the portfolio include any foreign securities these could expose the portfolio to any of the following risks: potential constraints on liquidity and the repatriation of funds; macroeconomic risks; political risks; foreign exchange risks; tax risks; settlement risks; and potential limitations on the availability of market information.

This portfolio is a Feeder Fund portfolio. A Feeder Fund portfolio is a portfolio that invests in a single portfolio of a collective investment scheme, that levies its own charges, which could result in a higher fee structure for the Feeder Fund.

This portfolio is a third party named, co-named portfolio. The Manager retains full legal responsibility for this portfolio. A third party named, co-named portfolio is a portfolio bearing the name of both the Manager and the financial services provider (FSP) where the FSP, under an agreement with the Manager, undertakes financial services of a discretionary nature, as contemplated in the Financial Advisory and Intermediary Services Act, Act No. 37 of 2002 (FAIS), in relation to the assets of the portfolio. Melville Douglas Investment Management (Pty) Ltd, an authorised FSP, FSP No. 595, FAIS, is the third party manager of this portfolio.

The FSP is a related party to the Manager, the FSP may earn additional fees other than those charged by the Manager. It is the responsibility of the FSP to disclose additional fees to the investor. This document is not advice, as defined under FAIS. Please be advised that there may be representatives acting under supervision.

All performance returns and ranking figures quoted are shown in ZAR and are based on data sourced from Morningstar or Statpro and are as at 30 June 2026.

Annualised return figures are the compound annualised growth rate (CAGR) calculated from the cumulative return for the period being measured. These annualised returns provide an indication of the annual return achieved over the period had an investment been held for the entire period. Actual annual figures are available on request from the Manager.

Portfolio performance figures are calculated for the relevant class of the portfolio, for a lump sum investment, on a NAV-NAV basis, with income reinvested on the ex-dividend date. Individual investor performance may differ due to initial fees, actual investment date, date of reinvestment of income and dividend withholding tax. Portfolio performance accounts for all costs that contribute to the calculation of the cost ratios quoted, all returns quoted are after these costs have been accounted for.

Statistics - Positive Months: the number of individual 1 month periods during the specified time period where the return was not negative; Max Gain: the maximum gain in a trough-to-peak incline before a new trough is attained, quoted as the percentage between the trough and the peak. It is an indicator of upside risk over a specified time period (quoted for all periods of 1 year or longer); Max Drawdown: the maximum loss in a peak-to-trough decline before a new peak is attained, quoted as the percentage between the peak and the trough. It is an indicator of downside risk over a specified time period (quoted for periods of 1 year or longer, where no value is shown no loss was experienced); Highest and Lowest: the highest and the lowest 1 year return (%) that occurred during the specified time period (quoted for all relevant classes launched 1 year or more prior to current month end date).

Additional information about this product including, but not limited to, brochures, application forms and annual or quarterly reports, can be obtained free of charge, from the Manager and from the Manager's website (www.stanlib.com).
