Additional Risk Information

Where foreign securities are included in the portfolio there may be additional risks, such as potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, tax risks, settlement risks, interest rate and potential limitations on the availability of market information.

The risk rating seen on page 1 is designed to give an indication of the level of risk, measured by volatility, associated with this specific portfolio. In order to arrive at the specific risk rating of the portfolio in question, Melville Douglas measures the volatility of the fund, in the form of standard deviation, over a three year rolling period, and compares the result to internal risk parameters. Please note that these risk ratings are designed as a guide only.

Statutory Disclosure and General terms and Conditions

This document does not constitute an offer to buy or a solicitation of an offer to buy or sell shares of the Fund in any jurisdiction in which an offer or solicitation is not authorised or to any person to whom it is unlawful to make such an offer of solicitation and is for information purposes only. Subscriptions will only be received and shares issued on the basis of the current prospectus and prospective investors should carefully consider the risk warnings and disclosures for the Fund set out therein. The value of shares may go down as well as up and investors may get back less cash than originally invested. Performance is calculated for the portfolio, as well as that the individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. Past performance is not necessarily a guide to future performance. An investment in the shares of the Fund is not the same as a deposit with a banking institution. Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down. Please refer to the prospectus for more details on the charges and expenses that may be recovered from the Fund. Shares are valued on a daily basis using 23:59 (UK Time) prices. Transaction requests received before 14h30 (UK Time) will receive the following valuation point share price. This is an accumulation portfolio and does not distribute income. Telephone calls may be recorded. Apex Financial Services (Corporate) Limited, STANLIB Fund Managers Jersey Limited and Melville Douglas Income Fund Limited are regulated by the Jersey Financial Services Commission.

Prices are calculated and published daily and are available from the manager on request.

Performance figures are calculated for the relevant class on a NAV basis.

Collective investment schemes are traded at ruling prices and can engage in borrowing and scrip lending. Collective Investment Schemes are generally medium to long-term investments.

An investment management agreement exists between the Fund, the Manager and Melville Douglas Investment Management (Pty) Ltd appointing Melville Douglas Investment Management (Pty) Ltd as the sole representative for the investment management functions performed in South Africa. Melville Douglas Investment Management (Pty) Ltd is a company registered in South Africa with company number 1987/05041/07, and a subsidiary of Standard Bank Group Limited. Melville Douglas Investment Management (Pty) Ltd is licensed as a financial services provider in terms of Section 8 of the Financial Advisory and Intermediary Services Act, 2002 (Act No. 37 of 2002). The appointed representative for the Fund in South Africa is STANLIB Collective Investments (RF) Pty Ltd.

The manager does not provide any guarantee either with respect to the capital or the return of the portfolio.

Quarterly Commentary

Fund Review

The objective of the Class Fund is to provide a return in excess of the Barclays Benchmark Overnight USD Cash Index, whilst seeking to maintain a high degree of capital preservation. Investment will primarily be in quality fixed, floating and inflation linked interest bearing securities, and, where in the opinion of the Investment Manager, direct investment in direct securities will not achieve sufficient diversification to achieve the Class Fund's objective, the fund may also invest in other collective investment schemes

The Fund's performance for the period was + 0.32% versus the Fund's benchmark return of + 0.01%

Market Overview

Despite a strong rally in risk assets during the quarter, US government bonds have traded in an exceptionally narrow range. The natural inclination should have been for 'safe-haven' yields to rise in this environment but the bond market remains heavily supported by ongoing robust quantitative easing (QE) measures and the US Federal Reserve's 'lower for longer' forward guidance on interest rates. In contrast to the stability exhibited in developed government bonds, Investment Grade (IG) and High Yield (HY) bond spreads have tightened considerably in line with the sharp recovery in global equity markets.

Looking Ahead

Whilst economic data appears to be solidly rebounding from the lows experienced during full lockdown, it remains unclear whether the economy will eventually experience a V, U or W shaped recovery. However, we do believe the worst has passed and a resumption to more normal growth levels (however long it takes) will, in time, unleash a major obstacle for the bond markets – namely, the dialling back of unprecedented stimulus measures.

The short end of the yield curve has flattened over the quarter which provides us with little opportunity to extend duration from current levels, as the risk reward trade off does not warrant taking on duration risk for no pick up in yield. The Fund remains with a defensive position to interest rate risk, with a bias to 'AAA' rated Supranational issuers which offer a yield pick up over U.S. Treasuries.

IG and HY corporate spreads tightened considerably in the quarter in line with the resurgence in risk appetite. At their peak in March, spreads for both investment and non-investment grade corporate debt only rose to half the levels experienced in the height of the credit crisis as a number of factors lent support to these markets, predominantly, central bank support via quantitative easing and the ongoing search for yield in a world of low and often negative interest rates. The Fund's exposure to Investment Grade credit was increased in the quarter, which has been the predominant driver of returns and offering a significant yield pick-up over US Treasuries and cash deposit rates.. The Manager has also allocated a small weighting (1%) to US High Yield credit. However, the short-term direction of risk assets, to which these markets are highly correlated to, is clearly uncertain given the recent rally and for this reason, we will look to marginally add to this position in periods of weakness. Taking a long term view and in the absence of yield in U.S. government bonds, we view an allocation to HY as a viable investment opportunity.
