

Melville Douglas Income Fund Limited

US Dollar Bond Class

Fund information update at 31 December 2021

What is the fund's objective?

The objective of the Class Fund is to provide a return in excess of its benchmark in US Dollars, whilst seeking to maintain a high degree of capital preservation.

What does the fund invest in?

The Class Fund invests primarily in quality global fixed interest securities, and, where in the opinion of the Investment Manager, direct investment in fixed interest securities will not achieve sufficient diversification to achieve the Class Fund's objective, in other collective investment schemes, money market instruments and cash that will maximise total returns in US Dollars.

What possible risks are associated with this fund?

The risk rating seen below is designed to give an indication of the level of risk, measured by volatility, associated with this specific portfolio. In order to arrive at the specific risk rating of the portfolio in question, Melville Douglas measures the volatility of the fund, in the form of standard deviation, over a three year rolling period, and compares the result to internal risk parameters. Please note that these risk ratings are designed as a guide only.

Risk rating

Conservative	Moderately conservative	Moderate	Moderately aggressive	Aggressive
--------------	-------------------------	----------	-----------------------	------------

What is the suggested investment period for this fund?

Minimum period

1 Month	6 Months	1 Year	3 Years	5 Years	7 Years
---------	----------	--------	---------	---------	---------

Who should consider investing in this fund?

This fund is suitable for investors who wish to avoid the volatility and risks associated with higher risk asset classes, and are looking for a return over and above that of cash. Investment will be via highly liquid sovereign and investment grade corporate debt, with a focus on capital preservation.

Income

Distribution Dividends may be declared from time to time in accordance with the provisions of Companies (Jersey) Law, 19941 (as amended). Currently, income available for distribution attributable to the Class X Shares of the Fund may be distributed; there is no intention to distribute income on the Class A Shares or Class B Shares.

Declaration 31 March, 30 September

Section 65 Approved

This Class Fund is approved for sale in South Africa under Section 65 of the Collective Investment Schemes Control Act, 2002 (CISCA).

Class A

Launch 16 May 2003
ISIN number JE00B54RMC79
SEDOL code B54RMC7
Bloomberg MDINUSD JY

Minimum investment requirements -

New business Closed
Initial \$ 15,000
Subsequent \$ 1,000

What are the costs to invest in this fund?

Maximum charges

	Class A
Initial fee (manager)	0.000%
Initial fee (adviser)	3.000%
Annual fee (manager)	0.950%
Annual fee (adviser)	0.500%
Performance fee	N/A

Annual fee (manager) - this is a service charge (% based) applicable to each class of a fund, that is levied on the value of your portfolio and includes the **Annual fee (adviser)** fee (where applicable). Annual fees are calculated and accrued daily and recovered monthly from the income awaiting distribution in the fund.

Cost ratios (annual) including VAT as at 31 December 2021

	Class A
Based on period from:	01/01/2019
Total Expense	1.06%
Transaction Costs	0.00%
Total Investment Charge	1.07%
1 Year Total Expense	1.06%

Total Expense (TER): This ratio shows the charges, levies and fees relating to the management of the portfolio and is expressed as a percentage of the average net asset value of the portfolio, calculated over the period shown and annualised to the most recently completed quarter. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER should not be regarded as an indication of future TERs.

Transaction Costs (TC): This ratio shows the percentage of the value of the fund incurred as costs relating to the buying and selling of the fund's underlying assets. TC are a necessary cost in administering the fund and impacts fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, investment decisions of the investment manager and the TER.

Total Investment Charges (TIC): This ratio is simply the sum of the TER and TC, showing the percentage of the value of the fund incurred as costs relating to the investment of the fund. It should be noted that performance figures account for all costs included in the TIC ratio, so you should not deduct the TIC from performance figures, the performance is already net of the TIC.

Quarterly update at 31 December 2021

Who are the investment managers?

Karl Holden

Head of International Fixed Interest and Currency Strategy

Karl joined Standard Bank in 1991 and specialises in global fixed income and currency markets. He is lead manager of the Melville Douglas Income funds and also manages the investments of a number of high-net-worth clients. Karl is a Chartered Wealth Manager, Fellow of the Chartered Institute for Securities and Investment and holds the Private Client Investment Advice and Management Certificate. Karl is based in Jersey.

Simon Bradbury

Fixed Income and Currency Strategy

Simon joined Standard Bank in 2002, with over 30 years' experience in the finance industry. He has built up extensive knowledge of global wealth management solutions, specialising in international fixed income and currency markets. He is co-manager of the Melville Douglas Income and Enhanced Income Funds, whilst he also manages the investments of a number of high-net-worth clients. Simon is a Chartered Fellow of the Chartered Institute For Securities and Investment and has been awarded Chartered Wealth Manager status.

Bernard Drotschie

BCom (Hons), CFA, CFP
Chief Investment Officer

Bernard joined Melville Douglas in 2002 as a portfolio manager and analyst, prior to which he worked for Absa Asset Management. He is the lead manager on the Melville Douglas Global Growth Fund (USD) and co-manages the Melville Douglas Balanced Fund (USD) and the Melville Douglas Income Funds. He holds a BCom (Hons) degree in Econometrics, is a CFA® Charterholder and a Certified Financial Planner™ professional.

Melville Douglas Investment Management (Pty) Ltd, FSP 595, an authorised Financial Services Provider under the Financial Advisory and Intermediary Services Act 2002, manage the investments of the fund. Since 1983 Melville Douglas has been delivering superior investment returns across a number of asset classes. As a global boutique investment management company within the Standard Bank Group, we are uniquely positioned to offer domestic and offshore investment solutions. What truly sets Melville Douglas apart is our experienced investment team and our approach to investing – driven by balance, a long-term view and a commitment to fundamental research – which informs our investment decisions across the board.

Fund review

The objective of the Class Fund is to provide a return in excess of its benchmark in US Dollars, whilst seeking to maintain a high degree of capital preservation, by investing primarily in quality global fixed interest securities, and, where in the opinion of the Investment Manager, direct investment in fixed interest securities will not achieve sufficient diversification to achieve the Class Fund's objective, in other collective schemes, money market instruments and cash that will maximise total returns in US Dollars.

The Fund's performance for the fourth quarter was -0.68% (A Class) and -0.48% (X Class) versus the Fund's benchmark return of -0.50%. For the full year the Fund delivered -2.11% (A Class) and -1.33% (X Class) ahead of the benchmark return of -2.54%.

Performance for 2021 was markedly ahead of the SA Peer Group (ASISA - Global IB Variable Term) which posted a negative return of -6.22%.

Market overview

The final quarter of the year has been characterised by concerns over the spread of the new coronavirus variant Omicron, but also from rising levels of inflation and the subsequent change in many central bank policies from monetary easing to monetary tightening. In the US, the Federal Reserve (Fed) voted in December to step up the removal of their monthly asset-purchase program from \$15bn to \$30bn per month and as such, it is now expected to end in March 2022. Also, the revision to the Fed's 'dot plot' now indicates three rate hikes in 2022, three in 2023 and a further two in 2024 taking the rate to just below their long-term neutral rate of 2.5%. Since the November meeting the Fed have become even more concerned over rising inflationary pressures which have proved to be far more sticky than they had envisaged earlier in the year. The employment market has recovered well with unemployment falling rapidly to 4.2% and this positive trend is set to continue as job vacancies still remain high in key sectors.

Looking ahead

Economic data remains favourable and growth for the year ahead, whilst slowing should still be above long-term trend levels. US Treasury yields remain expensive and have not fully discounted the more hawkish Fed, and with high inflationary pressures expected to persist in the year ahead we expect yields to continue to grind higher, most notably in the short to medium-dated area of the curve. With yields rising over the past year, the Fund's defensive strategy has added relative value, however we will be seeking opportunities to increase duration when market conditions allow. Looking at the quarters ahead, central banks will move at different speeds relative to the strength of their respective economies, levels of inflation and of course, the degrees of impact from ongoing COVID-19 infections, in particular the Omicron variant. Ultimately, in the absence of any unforeseen shocks, indications are that markets can accommodate tighter monetary policy as it unfolds in the year ahead. There remain many pillars of support for growth, perhaps the most obvious is that monetary conditions remain very easy and relative to growth conditions, should remain so even when interest rates begin to rise.

US Investment Grade (IG) credit spreads have widened slightly in 2021 as the negative outlook for government bond yields combined with the prospect of higher risk-free rates prompted some investors to take profits. We have for some time forecast a neutral outlook for IG markets given the distinct breakdown in correlation between spreads and risk assets generally. Whilst a reasonable pick-up in yield can be achieved through longer-dated lower rated BBB credit, historically tight spreads and expected higher government bond yields have meant we have been reluctant to increase exposure to this area of the market. We aim to increase the Fund's exposure to IG debt when yields appear more favourable on a long-term basis.

The US Dollar has posted its largest annual gain in over 6 years, up 6.37% against a broad basket of currencies (DXY Index). Positive yield and forward-looking interest rate differentials, coupled with strong growth and employment dynamics relative to other major developed economies contributed to the currency's strong performance in 2021. In addition, the recent surge in inflation has prompted the FOMC to provide a roadmap for interest rate hikes over the next three years, while other central banks like the ECB have been more reticent to withdraw stimulus lending further support to the US Dollar. Over the year the Fund retained its maximum overweight exposure to the US Dollar and this strategy is likely to remain in place until other major currencies appear sufficiently undervalued to warrant investment.

Disclosures

Collective Investment Funds (CIF) are generally medium to long term investments. The value of participatory interests may go down as well as up and past performance is not necessarily a guide to future performance. CIF are traded at ruling prices and can engage in borrowing and scrip lending.

The US Dollar Bond Class is a class fund of the Melville Douglas Income Fund Limited (the Fund). The Fund is an 'umbrella fund' and an open-ended investment fund company registered by way of continuation in Jersey under a certificate of continuance dated 31 March 2003 with limited liability under the Law as a no par value company. The Fund is regulated as a Collective Investment Fund by the Jersey Financial Services Commission. The manager of the Fund is STANLIB Fund Managers Jersey Limited (the Manager). The Manager is 100% owned by STANLIB Asset Management (Pty) Limited, which is wholly owned by STANLIB Limited, which is wholly owned by Liberty Holdings Limited. Liberty is a full member of the Association for Savings and Investments of South Africa (ASISA). The manager has a right to close a portfolio to new investors in order to manage the portfolio more efficiently in accordance with its mandate. The Manager does not provide any guarantee either with respect to the capital or the return of the class fund. A schedule of fees and charges and maximum commissions is available on request from the Manager. The custodian/trustee of the Fund is Apex Financial Services (Corporate) Limited (the Custodian). The Fund, the Manager and the Custodian are regulated by the Jersey Financial Services Commission.

The investments of this class fund are managed, on behalf of the Manager, by Melville Douglas Investment Management (Pty) Ltd (the Investment Manager), an authorised financial services provider (FSP), FSP No. 595, under the Financial Advisory and Intermediary Services Act (FAIS), Act No. 37 of 2002. The Investment Manager, pursuant to a distribution agreement made between it and the Manager, acts as distributor to the class fund in South Africa.

STANLIB Collective Investments (RF) (Pty) Limited is the appointed Fund's representative in the RSA, by the Manager, in respect of the Fund. The RSA Representative is responsible for assisting the Fund with compliance with RSA regulatory requirements in respect of certain Classes to be marketed to investors in the RSA.

Prices are calculated and published on each working day, these prices are available on the Manager's website (www.stanlib.com). This portfolio is valued at 23h59 (GMT). Forward pricing is used. Investments and repurchases will receive the price of the next day if received prior to 14h30 (GMT). Settlement must be made in the relevant class fund's base currency.

This portfolio is permitted to invest in foreign securities. Should the portfolio include any foreign securities these could expose the portfolio to any of the following risks: potential constraints on liquidity and the repatriation of funds; macroeconomic risks; political risks; foreign exchange risks; tax risks; settlement risks; and potential limitations on the availability of market information.

All return figures quoted are in USD, as at 31 December 2021, based on data sourced from Morningstar.

Annualised return figures are the compound annualised growth rate (CAGR) calculated from the cumulative return for the period being measured. These annualised figures account for all costs that contribute to the calculation of the cost ratios quoted, all fund returns quoted are therefore after these costs have been accounted for. Actual annual figures are available on request from the Manager.

Fund performance figures are calculated for the relevant class of the Fund, for a lump sum investment, on a NAV-NAV basis, with income reinvested on the ex-dividend date. Individual investor performance may differ due to initial fees, actual investment date, date of reinvestment of income and dividend withholding tax. Fund performance figures account for all costs that contribute to the calculation of the cost ratios quoted, all fund returns quoted are therefore after these costs have been accounted for.

Statistics - Positive Months: the number of individual 1 month periods during the specified time period where the return was not negative; Max Gain: the maximum gain in a trough-to-peak incline before a new trough is attained, quoted as the percentage between the trough and the peak. It is an indicator of upside risk over a specified time period (quoted for all periods of 1 year or longer); Max Drawdown: the maximum loss in a peak-to-trough decline before a new peak is attained, quoted as the percentage between the peak and the trough. It is an indicator of downside risk over a specified time period (quoted for all periods of 1 year or longer, where blank no loss was experienced); Highest and Lowest: the highest and the lowest 1 year return (%) that occurred during the specified time period (quoted for all relevant classes launched 1 year or more prior to current month end date).
